Notes on Forward-looking Statements

This report may contain forward-looking statements concerning the Fund, its future performance, its strategies or prospects or about future events or circumstances. Such forward-looking statements include, among others, statements with respect to our beliefs, plans, expectations, estimates and intentions. The use of the expressions “foresee”, “intend”, “anticipate”, “estimate”, “assume”, “believe” and “expect” and other similar terms and expressions indicate forward-looking statements. By their very nature, forward-looking statements imply the use of assumptions and necessarily involve inherent risks and uncertainties. Consequently, there is a significant risk that the explicit or implicit forecasts contained in these forward-looking statements might not materialize or that they may not prove to be accurate in the future. A number of factors could cause future results, conditions or events to differ materially from the objectives, expectations, estimates or intentions expressed in such forward-looking statements. Such differences might be caused by several factors, including changes in Canadian and worldwide economic and financial conditions (in particular interest and exchange rates and the prices of other financial instruments), market trends, new regulatory provisions, competition, changes in technology and the potential impact of conflicts and other international events. The foregoing list of factors is not exhaustive. Before making any investment decision, investors and others relying on our forward-looking statements should carefully consider the foregoing factors and other factors. We caution readers not to rely unduly on these forward-looking statements. We assume no obligation to update forward-looking statements in the light of new information, future events or other circumstances unless applicable legislation so provides.

Addenda Income Focus Fund

Management Discussion of Fund Performance

Investment Objective and Strategies

The Addenda Income Focus Fund's (the "Fund") investment objective is to provide income while focusing on capital preservation and providing some potential for capital growth by investing primarily in a mix of domestic and foreign fixed income-oriented securities and to a lesser extent, domestic and foreign equity securities through a sustainable investment approach. Such investments may be made by the Fund either directly or indirectly through investments in other mutual funds, including ETFs.

To achieve the Fund's investment objective, the Manager uses strategic asset allocation as the principal investment strategy. The Fund has a target weighting of 65-95% in Fixed Income and Money Market, and a target weighting of 5-35% in Equity.

In addition, when selecting the majority of securities in which the Fund invests, the Manager will integrate environmental, social and governance (ESG) matters along with active stewardship, which covers engagement with issuers and proxy voting.

Risk

There were no significant changes to the investment objectives or strategies that affected the Fund's overall level of risk during the period. There were no changes to the Fund's risk rating during the reporting period. This Fund remains suitable for investors who are seeking a combination of current income and some long term growth and who have a low tolerance for risk.

Results of Operations

The decline in interest rates during the last quarter of 2023 and expectations of an extension of the business cycle led to positive returns across most major financial markets. The Income Focus Fund (Series A) returned 6.99% for the year while the benchmark index, composed of 70% FTSE Canada Universe Bond Index, 10% Bloomberg US High Yield 2% Issuer Capped Index (C\$ hedged), 10% S&P/TSX Composite Index, 5% S&P 500, and 5% MSCI EAFE Net (CAD), posted a 9.09% return. The fund underperformed the benchmark primarily due to a defensive asset mix with a higher allocation to cash and slightly below benchmark weight in equities overall. All underlying asset classes added value versus their respective benchmarks except for International equities, which underperformed on the year. Please refer to the "Past Performance" section for the returns by series, which may vary because of differences in management fees and expenses.

Duration was added to the fixed income allocation in September as rates rose, and this was a significant positive source of relative performance as rates fell in the fourth quarter. Credit spreads narrowed during the year and a modest overweight allocation to the Provincial and Corporate bond sectors were sources of added value. As well, allocations to Global bonds and High Yield securities were positive sources of relative value add.

The Canadian Climate Transition equity allocation rose 13.5% during the year, outperforming its benchmark by 171 bps. The Climate Transition International Equity allocation returned 13.7% during the year, underperforming its benchmark by 141 bps. The US Equity allocation returned 23.9% during the year, outperforming its benchmark by 100 bps.

Recent Developments

Central banks received welcome news on the economic front as inflation continued to trend down throughout the year and the labour market moved towards a better balance. The decline in interest rates during the last quarter of 2023 and expectations of an extension of the business cycle led to positive returns across most major financial markets.

Interest rates were extremely volatile across the curve, hitting new high levels in October and then falling aggressively into December. Short-term yields fell more than the longer term as the market priced in rate cuts by central banks in 2024. The 2-10-year curve remained inverted throughout the year and finished with 10-year yields 78 bps lower than 2-year.

Economic growth is expected to slow in 2024 but remain positive as domestic demand is supported by a fully employed labour market. Against the backdrop of slowing economic growth and moderating inflation, central banks will now manage policy with a focus on economic growth. The U.S. Federal Reserve has the opportunity for a mid-cycle ease in rates in mid-2024, while the Bank of Canada faces the risk of further tightening and will likely need to maintain higher rates for most of the year.

Related Party Transactions

Addenda Capital Inc. ("Addenda") is the Manager and Portfolio Manager of the Fund. Addenda is controlled by Co-operators Financial Services Limited ("CFSL"), a wholly-owned subsidiary of Co-operators Group Limited. Addenda pays the "Operating Expenses" (defined below) of the Fund other than its "Fund Expenses" (defined below), in exchange for the Fund's payment to the Manager of annual fixed-rate administration fees with respect to each series of the Fund.

The administration fees are equal to a percentage of the net asset value of each series of the Fund calculated and paid in the same manner as the Fund's management fees. The Operating Expenses include, but are not limited to: audit and legal fees; transfer agency and recordkeeping costs; accounting and valuation fees; safekeeping and custodial costs; trustee services costs; and the costs of preparing and distributing financial reports, prospectuses, annual information forms, fund facts, continuous disclosure materials and other investors communication.

In addition to administration fees, the Fund shall also pay certain Fund Expenses, namely: taxes (including, without limitation, GST and PST or HST, capital taxes, income taxes and withholding taxes); bank charges, borrowing and interests; termination fees; regulatory filing fees; costs related to the Independent Review Committee ("IRC"); Operating Expenses incurred outside of the normal course of business of the Fund; costs of compliance with newly adopted securities regulations; and costs associated with portfolio transactions, brokerage fees and other trading expenses.

The Fund also pays annual management fees to Addenda as consideration for its services.

For more details on the Fund's fees and expenses, please refer to the "Fees and Expenses" section in the Simplified Prospectus.

Addenda has established the IRC for the Fund in accordance with the requirements of *National Instrument 81-107 - Independent Review Committee for Investment Funds* in order to review conflicts of interest as they relate to investment fund management. The Fund did not rely on an approval, positive recommendation or standing instruction from the Fund's IRC with respect to any related party transactions in the period.

Addenda Income Focus Fund

As at December 31, 2023, Addenda held 2 Fund securities for a value of \$20, which represented close to 0% of the net asset value of the Fund at that date. Transactions between Addenda and the Fund were carried out in the normal course of business.

As at December 31, 2023, CFSL held 10,067,545 Fund securities for a value of \$100,941,234, which represented 99.81% of the net asset value of the Fund at that date. Transactions between CFSL

and the Fund were carried out in the normal course of business and at the Fund's net asset value as at the transaction date.

As a result of these transactions, the Fund may be subject to large investor risk as discussed in the Simplified Prospectus. Addenda manages this risk to reduce the possibility of any adverse effect on the Fund or on its investors, through such processes as requiring advance notice of large redemptions and large transaction fee.

* For the period from March 28, 2022 (beginning of operations) to December 31, 2022.

⁽¹⁾ This information is provided as at the last day of the accounting period shown.

⁽²⁾ Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

⁽³⁾ The trading expense ratio represents total commissions and other Fund transaction costs expressed as an annualized percentage of daily average net asset value during the period.

⁽⁴⁾ The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management Fees

The Fund pays annual management fees to the Fund manager for its management services. The fees are calculated based on a percentage of the Fund's daily net asset value before applicable taxes and are paid on a monthly basis. A portion of the management fees paid by the Fund covers maximum annual trailer fees and sales commissions paid to brokers. The remainder of the management fees primarily covers investment management and general administration services. The breakdown of major services provided in consideration of the management fees, expressed as an approximate percentage of the management fees is as follows:

	Management Fee (%)	Breakdown of Services	
		Investment Advisory and Other Fees (%)	Trailer Fee (%)
Series A	1.20	41.61	58.39
Series F	0.50	100.00	N/A

Past Performance

Performance data assumes that all distributions of each series of the Fund for the periods shown were reinvested in additional Fund units. However, it does not take into account purchases, redemptions, investments or other optional charges, and returns would be lower if it did.

The past performance of each series of the Fund is not necessarily indicative of future performance.

Annual Performance (%)

* Beginning of operations on March 28, 2022

These graphs present the annual performance of each series of the Fund for each fiscal year shown and illustrate the evolution of each series of the Fund from one year to the next. These graphs also indicate, in percentage terms, how the value of an investment made on the first day of each fiscal year would have

Addenda Income Focus Fund

evolved as of the last day of that fiscal year. The last column shows the total performance of each series of the Fund for the interim period. Returns may differ from one series to another for a number of reasons, including if the series was not issued and outstanding for the entire period under review and because of the different levels of management fees and expenses.

Comparison with the Index

The Income Focus Fund (Series A) returned 6.99% for the year while the benchmark index posted a 9.09% return. The fund underperformed the benchmark primarily due to a defensive asset mix with a higher allocation to cash and slightly below benchmark weight in equities overall. All underlying asset classes added value versus their respective benchmarks except for International equities, which underperformed on the year. Please refer to the "Past Performance" section for the returns by series, which may vary because of differences in management fees and expenses.
